

# EMIHS 5-minute Lineup Drill

## Transport of patients in police custody

### Must:

- ✓ Be a patient with a chief complaint (including undifferentiated agitation)
- ✓ Be transporting to a medical facility
- ✓ Receive all appropriate medical assessments and treatments
- ✓ Be accompanied by a law enforcement officer in the transport unit

### Must not:

- ✗ Allow police to dictate any treatment or transport decisions
- ✗ Allow any patient to be handcuffed behind their back, restrained face down, or positioned in any other way that compromises patient assessment or care
- ✗ Provide medical equipment (reeves) solely for law enforcement purposes or restraint

Severe agitation is a condition that must be appropriately investigated, managed, and documented
